
Dear Members,

I hope everybody's enjoying the steel chairs and Bay canopies. We have a quick addendum regarding hanging the metal chairs from the canopies.

Can everybody please hang the chairs upside down on the hooks. We were hanging the chairs upright but the wind is moving the chairs enough the back webs are pulling off the frame. Hanging the chairs upside down will eliminate the problem.

As an update, we've had more steel targets donated and rotating targets donated for bullseye pistol shooting. We're in the process of developing a layout, an actuating system, as well as concrete stands for the rotating targets. We may need the help of an electrician if somebody would like to donate a little time.

I think our range is awesome! Every member can help by keeping it clean. Pick up your trash, pick up your brass, and there's nothing wrong with cleaning up other shooters mess either.

Have fun, be safe, and get in that trigger time.

Greg McCombs
Range Engineer
